Art Unit: 1742

1. The Examiner finds that the amendment overcomes the double patenting rejection, and that the terminal disclaimer overcomes the obvious type double patenting rejection. The Examiner acknowledges that claim 6 was incorrectly perceived as a dependent claim in the prior rejection. A new rejection of that claim is made at this time which is accordingly not made final.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The Examiner finds that claim 6 is ambiguous. It is unclear whether the Applicant intends the "not decomposed" limitation is intended to be directed to just the foaming step, or to the entire process. Either way, the Examiner does not understand how during either the foaming or debinding, the foaming agent or the binder is not decomposed.

4. Claims 1-5 and 7-48 are allowable. The Examiner finds that the prior art does not teach or suggest the wherein the dry mixture contains both the binder and the foaming agent.
